

CELCAT® Software Integration Plugin Implementation Sign-Off

Introduction

The CELCAT *Timetabler 6* software provides a mechanism for integrating data from existing management systems. This is achieved using bespoke 'plugins' that are written by CELCAT to a customer's specification.

This document records the official acceptance of the plugin software integrating [**MIS name here**] with CELCAT *Timetabler 6* for [**Institution name here**].

Software Details

Requirements: [**requirements document version here**]

Name: [**plugin name here**]

Version: [**plugin version here**]

Delivery date: [**delivery date here**]

Signature of Approval

As coordinator/representative for CELCAT bespoke development at [**Institution name here**], I certify that the plugin conforms to the agreed requirements. I understand that change requests (to requirements or software) following acceptance are subject to review by CELCAT and usually attract additional development costs.
