

# CELCAT® Software Integration Plugin Requirements Sign-Off

## Introduction

The CELCAT *Timetabler 6* software provides a mechanism for integrating data from existing management systems. This is achieved using bespoke 'plugins' that are written by CELCAT to a customer's specification.

This document records the official approval of the Requirements Specification Document for the plugin integrating [MIS name here] with CELCAT *Timetabler 6* for [Institution name here].

## Requirements Document

Author: [name of author here]

Version: [document version here]

## Signature of Approval

As coordinator/representative for CELCAT bespoke development at [Institution name here], I certify that the above document is an accurate and comprehensive representation of our requirements. I understand that subsequent change requests to the requirements are subject to review by CELCAT and usually attract additional development costs.
